Welcome to the Vienna Internet eXchange!

The **Vienna Internet eXchange (VIX)** was established 1996 as a basic peering facility at the University of Vienna for primarily Austrian Internet Service Providers (ISPs).

It has grown since then to a redundant, dual-site, high-performance, high-availability Internet Exchange Point (IXP) with national and international participants from the Central and Eastern European Region.

Welcome at VIX!

June 02, 2009 RIPE NCC launches Website: IPv6 Act Now

"Now is the time to recognise that sustainable growth of the IPv4-based Internet is coming to an end, and that it is time to move on, with IPv6 as the successor."
